

## **Certificate of Formulation**

**Product:** DMEM<sup>9fp</sup> antibleaching live cell visualization medium

Catalog No: MC101
Volume: 100 ml
Form: liquid

Concentration: 16.5384 g/L

**pH** 7.2 - 7.4

**Storage conditions:** store tightly closed at 4 - 8°C. Do not freeze!

**Shipping conditions:** room temperature

**Shelf life:** 6 months from date of receipt under proper storage

conditions

**Lot number:** 10100011111

## Use

Replace your cell culture medium with DMEM<sup>gfp</sup> 20-30 min before starting imaging experiment. The replacement should be performed under sterile conditions.

## Notice to Purchaser:

Evrogen Cell Medium Products (the Products) are intended for research use only. The Products are covered by Evrogen Patents and/or Patent applications pending.

## Material safety data sheet information:

To the best of our knowledge, these products do not require a Material Safety Data Sheet. However, all the properties of these products (and, if applicable, each of their components) have not been thoroughly investigated. Therefore, we recommend that you use gloves and eye protection, and wear a laboratory coat when working with these products.

| Component                          | Concentration, mg/L |
|------------------------------------|---------------------|
| CaCl <sub>2</sub>                  | 200                 |
| FeSO <sub>4</sub> x7H2O            | 0,07                |
| KCI                                | 400                 |
| MgSO <sub>4</sub>                  | 97,67               |
| NaCl                               | 6400                |
| NaHCO <sub>3</sub>                 | 3700                |
| NaH <sub>2</sub> PO <sub>4</sub>   | 108,7               |
| Glucose                            | 4500                |
| Sodium Pyruvate                    | 110                 |
| L-Arginine HCI                     | 84                  |
| L-Cystine                          | 63                  |
| Glycine                            | 30                  |
| L-Histidine HClxH <sub>2</sub> O   | 42                  |
| L-Isoleucine                       | 105                 |
| L-Leucine                          | 105                 |
| L-Lysine HCI                       | 146                 |
| L-Methionine                       | 30                  |
| L-Phenylalanine                    | 66                  |
| L-Serine                           | 42                  |
| L-Threonine                        | 95                  |
| L-Triptophan                       | 16                  |
| L-Tyrosine 2Na x 2H <sub>2</sub> O | 104                 |
| L-Valine                           | 94                  |
